

Give Your Heart the Gift of Life!

by Terry... Naturally

Cardiovascular disease kills one million per year and cripples several million more!

Do you know there is a completely safe, non-surgical, painless, natural therapy that can prevent and even reverse heart disease?

This formula is a powerful cardiovascular support formula that utilizes a broad-spectrum therapeutic approach. It will help maintain a healthy circulatory system by binding heavy or toxic metals and plaque causing materials. Did you know that your arteries could be over 80% clogged before you have any symptoms? Harmful buildup of plaque in the circulatory system causes a lack of blood flow to tissues including sex organs, heart and skin. This decreased blood flow affects the tissue and organ function and causes premature aging and in some cases can progress to Coronary Heart Disease. Clearing the arteries and promoting good circulation is a major key to longevity and health. This formula will help do that and the added bonus is that many of the heavy metal toxins that cause untold problems may also be removed.

Heart disease is the number one killer in the United States today, with Coronary Heart Disease (CHD) being the most common form of the disease. Approximately one million Americans die from heart disease each year. Conventional medical procedures (i.e. Bypass or open heart surgery, balloon angioplasty, etc.) and the use of drugs to relieve symptoms, unless used in emergency situations, have been shown (for the most part) to be only "temporary fixes." The underlying problem which causes heart disease and circulatory problems must be addressed in order to not only stop progression of the disease but to actually reverse it.

Like any muscle in the body, the heart muscle requires a constant supply of oxygen and nutrients which are carried by the blood

in the coronary arteries via the peripheral arteries. When these arteries become narrowed and clogged by plaque, blood and oxygen do not flow freely and properly to the tissues and organs, (especially the heart). Both CHD and peripheral circulatory disease may occur. However, increasing the diameter of the arteries will allow the nutrients and oxygen-rich blood to flow more freely and efficiently.

This formula is a safe and effective non-surgical oral chelation therapy for dissolving and removing existing plaque from the arterial walls. While intravenous chelation does provide quick results much of the time, researchers are now finding that oral chelation therapy

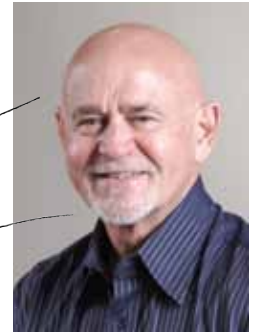

Look for this formula at your local health food store:

Vitamin C 400 mg, Vitamin E 400 IU, Niacin 20 mg, Vitamin B-6 25 mg, Folic Acid 1,000 mcg, Vitamin B-12 1,000 mcg, Calcium 200 mg, Magnesium 200 mg, Potassium 200 mg, L-Cysteine 200 mg, CoQ10 30 mg, L-Carnitine 75 mg, Ginkgo Biloba (24%) 30 mg, Nattokinase 75 mg, EDTA 600 mg

formulas can also provide this same relief, and in many instances, in a relatively short period of time. Some of the important components that drive the chelating mechanisms of this formula are EDTA (ethylene diamino tetra-acetic acid) an amino acid that binds with calcium (the major component in arterial plaque) and heavy metals in order to remove them from the body.

A world-famous N.D., the originator of oral chelation, has continuously refined and improved this original formula. A double-blind study in a hospital specializing in cardiovascular problems proved that this formula restored previously occluded arteries to functional conduits for blood flow! It helps prevent the

To your good health,
Terry... Naturally

changes in the blood vessels which result in heart disease and changes the biochemistry of the body in such a way that the harmful changes which have already taken place, can slowly but surely be REVERSED!

One look at the formula tells you, this formula is just too good to pass by, Vitamin C, Vitamin E, Niacin, Vitamin B-6, Folic Acid, Potassium, Cysteine, L-Carnitine, CoQ-10, Ginkgo Biloba and the remarkable chelating agent, EDTA.

With cardiovascular problems being the most common cause of death, it behooves everyone over 40 to consider this product essential in their supplement program.

Some doctors consider this formula the most important supplement of all, because without its benefits to the circulatory system, other supplementation will be far less effective. If your circulatory system is plugged up, then the necessary oxygen and other nutrients will not get to your cells and the disease process will begin in your weakest tissues. If you are over 40, the possibility that you have some degree of plaque in your arteries is 100%. Don't wait until the doctors want to do surgery. Try this formula, a time-tested oral chelation formula for maximum cardiovascular health. TM

When in doubt, always consult your physician or health care practitioner. This column is to provide you with information to maintain your health.
