

Trica-Sil™

- **Support for Healthy Bone and Cartilage**
- **Healthy Skin and Hair**
- **Beautiful Nails***

Trica-Sil™ has been used in Europe for over 15 years and has been recognized as highly effective by thousands of practitioners, as well as hundreds of thousands of satisfied consumers.

What is Silica?

Silica is a critical trace mineral that supports bone health, bone density, and other body systems as well. Silica is found in bones, teeth, skin, eyes, glands and organs. It's also a major constituent of collagen, which helps keep skin elastic and blood vessels strong. Additionally, silica is necessary for absorption of calcium to maintain healthy, strong bones.

A Nobel Prize winning chemist, Professor Adolf Butenandt, proved that life as we know it cannot exist without silica. According to research conducted at Columbia University, silica is an essential nutrient and must be supplied continuously from food sources. Many studies have confirmed that silica plays an important role in many body functions and has a direct relationship to calcium and mineral absorption.

Why is Trica-Sil™ Superior?

The manufacturing process that is used to produce **Trica-Sil™** (low heat, no chemicals, no solvents) allows for the natural equilibrium of the silica to be preserved along with the other minerals. The high flavonoid content enables optimal assimilation of the silica. Silica is a very important element that highly refined modern diets are

frequently lacking. It has become necessary to add supplemental silica, especially if bone health is a concern. Additionally, the silica and flavonoids are bound to marine lipids, dramatically enhancing both absorption and effectiveness.

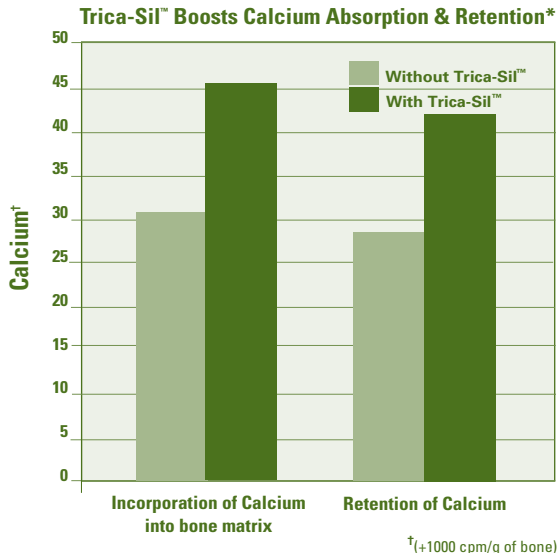

The bioavailability of **Trica-Sil™** is virtually 100%, and due to the proprietary processing, the flavonoid organic bond remains intact. Thanks to its fine micronization, along with this bond, the silica is highly bioavailable and can be entirely mobilized by the body's cells in total safety.

The silica contained in **Trica-Sil™** is thus significantly more beneficial to the cells compared to standard horsetail or crystallized mineral silica from a non-botanical source.

	Trica-Sil™	Other Horsetail Extracts	Crystallized Silica (Non-Botanical)
100% Bioavailable	YES	NO	NO
Clinically proven for bone health	YES	UNKNOWN	UNKNOWN
Contains beneficial botanical cofactors	YES	VARIES	NO
Water soluble	YES	PARTIALLY	NO
Solvents	NO	UNKNOWN	UNKNOWN
Marine lipid-enhanced absorption	YES	NO	NO
Non-water soluble harsh plant compounds removed	YES	NO	N/A
Organic Silica	YES	N/A	NO
Immune support	INCREASES	VARIES	DECREASES
Standardized for silica content	YES	VARIES	N/A
Low heat, water extraction	YES	UNKNOWN	UNKNOWN

How Trica-Sil™ Maximizes Calcium

Trica-Sil™ increases the incorporation of calcium into the bone which supports a healthy balance of calcium retention.* The longer you hold on to calcium in your bones, the longer you retain strong, healthy bones. This positive effect can also be extended to all supporting tissues (tendons, hair, teeth, skin and nails, etc).

In vitro evaluation of the effect of Trica-Sil™ on the metabolism of bone matrix. Biopredic (Rennes, France) 1999.

For optimum bone health, we recommend these products by Terry Naturally.

OsteoStrong™ – Maintain Strong, Healthy Bones*

Bone is exceptional living tissue and requires much more than just calcium. Bone requires a variety of nutrients including minerals, amino acids and trace minerals. OsteoStrong is a unique proprietary formula that contains all the necessary nutritional components that makes bone a living structure. In addition to the standard necessary vitamins and minerals for strong, healthy bones, OsteoStrong contains a unique form of vitamin K-2 (Mena-Q7™) that dramatically improves calcium absorption into the bones. With OsteoStrong, you will be protecting your bones for life.*

Strontium – Trace Mineral Essential for Bone Health*

Strontium is one of the many trace minerals essential for bone health. Studies indicate that strontium positively affects bone strength and maintains healthy bone density. Strontium may support bone formation and decrease bone resorption (or breakdown), thereby enhancing bone mineral density (BMD).*

For healthy hair try Hair Renew Formula™ by Terry Naturally with exclusive Millet seed oil extract

Hair Renew Formula™ – Sustains Healthy Hair Growth and Helps Prevent Age-Related Hair Loss*

Hair Renew Formula™ provides essential nutrients for healthy hair growth. The unique millet seed oil extract contains valuable linoleic acid, the triterpenoid miltiacin, as well as other phytosterols and squalene to help sustain healthy hair growth and strength. Zinc is essential for healthy hair structure and growth. Biotin helps build proteins including keratin, an important structural element of hair. Vitamin B6 is needed by the body for protein utilization. Pantothenic Acid is particularly important for faster-growing cells, including those in hair roots, and a prerequisite for healthy hair growth. These nutrients are important for beautiful, healthy hair in both men and women.*
